DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 18-28 and 73-86 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ekholmer (US 4,717,379).

Ekholmer teaches a catheter comprising an elongated support (5) constructed from a first material; and a porous membrane (1) constructed from a second material that is wrapped around an entire circumference of the support (Fig 2), said support having a lumen between the porous membrane and the support (3), where fluid enters the proximal end of the lumen and exits through the pores (4, Fig 1).

Ekholmer does not expressly disclose that the first and second membranes are made of a different material. However, the cross-hatchings in the figures indicate that they are different materials, as well as the description (Col 2 lines 20-40) of making the catheter. Additionally, a porous membrane is generally flexible and may be difficult to position in the body without extra support, so it would be beneficial to provide a more rigid support. Or, the porous membrane may be very expensive and it is desirable to use a less expensive inner material. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use two different materials for the support and

Application/Control Number:

10/031,913 Art Unit: 3767

porous membrane as this is suggested by the drawings and description and would provide the additional benefit of having a more rigid inner catheter.

As to claim 20, 21, 27, 73, 80, 82, 83 see "Of course it would be possible to instead provide the inner tube 3 with longitudinal partitions 7 on the outside, at which the outer tube 6 can be plane" and Fig 2, which shows ribs (7) that porous membrane (1) is wrapped around. See also Fig 3 for "dome-shaped end portion."

As to claim 22, 75, 85, 86 see Fig 4, non-porous membrane (8).

As to claim 23, 24, 76, 77 see Fig 2 and paragraph spanning Col 1-2, which suggests all the passages are separate.

As to claim 25, 78, 84 the device must be somewhat flexible in order to be guided into the body for a long insertion time and without irritation (Summary of the Invention)

As to claim 26, 79 guidewire lumen (2)

As to claim 28, 81 Ekholmer does not disclose the dimension of the pores. Instead, they are described as "very small capillary holes." It would have been obvious to one of ordinary skill in the art at the time the invention was made to use pores of less than .023 microns since it has been held that selecting an optimum dimension involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Response to Arguments

2. Applicant's arguments with respect to claims 18-28 and 73-86 have been considered but are most in view of the new ground(s) of rejection.

10/031,913 Art Unit: 3767

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
